

RequestHub iteration 2 Plan

Introduction

This plan showcases what our development team will have in store for you in iteration 2. The main goal of this iteration is to modify the content of iteration 1, modify the framework of the website, and modify the appearance of the web page for the change. So that subsequent iterations can carry out more in-depth development on this basis.

Iteration 2 Requirements

1. Modify the problem in iteration 1.
2. Add security measures to make user information more secure, such as using hash functions.
3. Modify the project framework to make the project easier to maintain.
4. Design new styles for main interfaces such as dashboard.
5. Modify the remaining pages without cosmetic changes.
6. Modify the database and enrich stored information, such as email addresses and avatars.

Timeline

Task	Date	Participant
Meeting	Week 10 (07/05)	All group members
Start iteration 2	Week 10 (07/05)	All group members
Add security measures, modify the project framework, modify the database and enrich stored information	Week 10 (08/05~12/05)	Zhenhao Zhu
Add avatars function	Week 11 (12/05~14/05)	Zhenhao Zhu
Design new styles for main interfaces such as dashboard	Week 10 (11/05~13/05)	Zihan Peng
Modify the remaining pages without cosmetic changes.	Week 10 (10/05~13/05)	Renjun Liu
Iteration 2 ends	Week 11 (14/05)	All group members
