RequestHub iteration 3 Plan

Introduction

This plan shows what our development team will have in store for you in Iteration 3. The main goals of this iteration were to modify the content of Iteration 2, further modify the framework of the project, and modify the appearance of the web pages to accommodate the changes.

Iteration 3 Requirements

1. Modify the problem in iteration 2.
2. Further modifications to the project file framework to make it easier to maintain and prevent malicious attacks.
3. Test, review and fix all page issues.
4. Add css to make the page layout suitable for mobile device sizes such as mobile phones.
5. Add javascript and use api to obtain resources to meet ajax requirements.

Timeline

Task	Date	Participant
Meeting	Week 11 (14/05)	All group members
Start iteration 3	Week 11 (15/05)	All group members
Further modifications to the project file framework	Week 11 (15/05 - 19/05)	Zhenhao Zhu
Fix avatar function for users in some pages and a page for users to edit their email and user name.	Week 11 (15/05 - 19/05)	Zhenhao Zhu
Use flask blueprint to module the application files, which makes the application easier to expand and maintain. Use the flask login module to ensure user data security.	Week 11 (15/05 - 19/05)	Zhenhao Zhu
Test, review and fix all page issues.	Week 11 (15/05 - 19/05)	Zihan Peng & Renjun Liu

Add css to make the page layout suitable for mobile device sizes	Week 11 (15/05 - 19/05)	Zihan Peng & Renjun Liu
Add javascript and use api to obtain resources	Week 11 (17/05 - 19/05)	Yuchen Wang
Iteration 3 ends	Week 11 (20/05)	All group members
